

AN AGENT YOU'LL USE EVERY DAY

Bagel works the night shift.

A beagle who preps tomorrow while you sleep, and makes the calls you dread.

🌙 2 AM night shift · 🗞️ 7 AM The Morning Bark · 📞 9 AM awkward calls

🔓 Open source, open weights · 💻 Runs on your machine · 🧠 Your choice of model

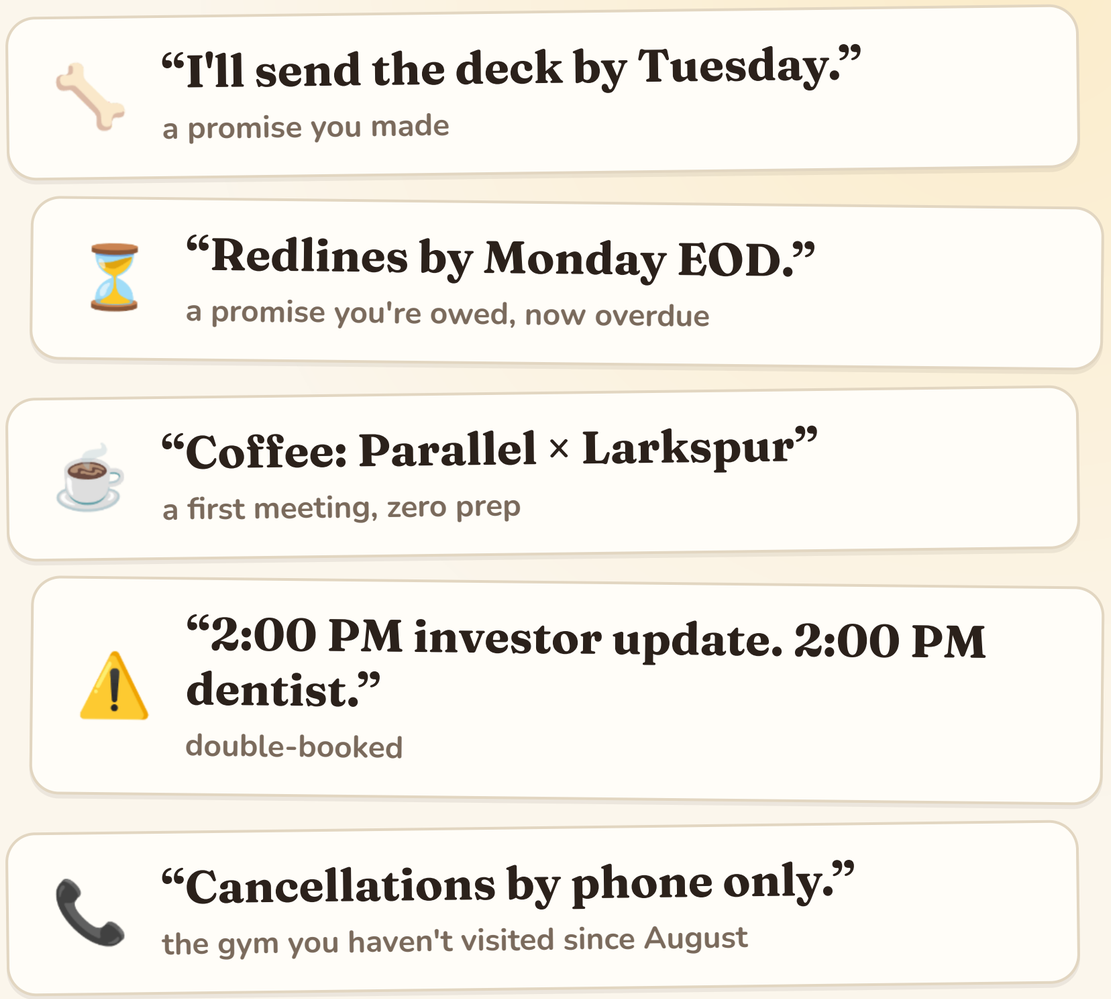

Built with **Cline SDK** · **Qwen 3.8** on W&B Inference · **Parallel** · **ElevenLabs** · **Composio**-ready

THE GAP

Personal agents wait to be asked. *Your day doesn't.*

Muse and Instinct are great at errands, when you remember to ask. What drains a day is everything nobody thinks to ask for.

An agent you use **every day** can't wait to be asked. It has to show up on its own, with the work already done.

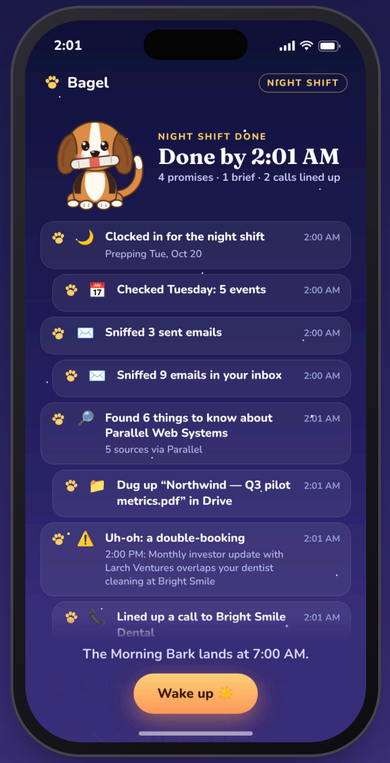

THE PRODUCT

One day with Bagel

🌙 2:00 AM THE NIGHT SHIFT

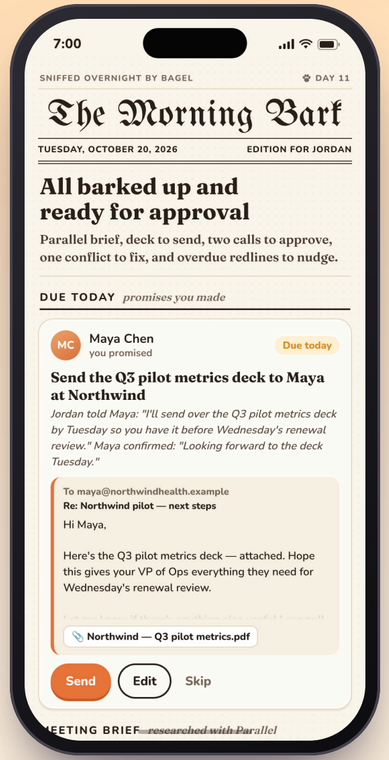

Clocks in while you sleep

- 🐾 Reads tomorrow's calendar and inbox
- 🐾 Tracks every promise, both ways
- 🐾 Researches first meetings, lines up calls

☀️ 7:00 AM DELIVERED

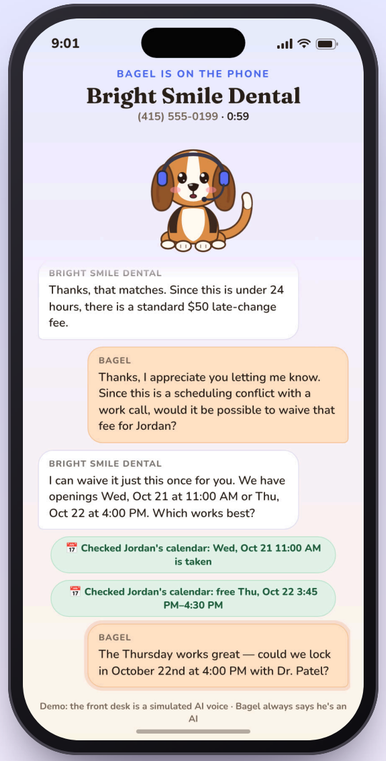

The Morning Bark

- 🐾 Drafts with the right file attached
- 🐾 Nudges, a cited brief, a conflict fix
- 🐾 One tap each. Nothing sent without you

📞 9:00 AM WHEN THEY OPEN

Makes the awkward calls

- 🐾 Says he's an AI, checks your calendar
- 🐾 Dentist moved to Thu 4 PM, $50 fee waived
- 🐾 Gym cancelled, retention offers declined

HOW IT WORKS

A Cline SDK agent with a night job

2:00 AM

Night-shift agent
Cline SDK · Qwen 3.8 on W&B, or any model you choose

- Composio `GMAIL_FETCH_EMAILS`
- Composio `GOOGLECALENDAR_EVENTS_LIST`
- Composio `GOOGLEDRIVE_FIND_FILE`
- Parallel `research_meeting · Task API`
- Cline tool `record_promise · record_conflict · propose_call`

7:00 AM

You, one tap each
The Morning Bark

- Composio `GMAIL_SEND_EMAIL`
- Bagel `schedule calls for opening time`

9:00 AM

Bagel on the phone
Cline SDK agent · ElevenLabs voices

- Composio `GOOGLECALENDAR_FIND_FREE_SLOTS`
- Composio `GOOGLECALENDAR_PATCH_EVENT`
- ElevenLabs `Bagel + front desk voices`

76 s
overnight run · 4 agent turns · 31.7k tokens in

6 facts · 5 sources
one Parallel Task run for the 10:30 coffee

4 promises · 2 calls
and 1 double-booking, found while you slept

$50 → $0
late fee waived on the call · gym cancelled, no fees

✓ Draft-first: nothing sent without a tap

✓ Open source, runs on your machine

✓ Composio tool shapes: one swap to real accounts

Demo: sample inbox & calendar · the phone's front desk is a simulated voice

WHY YOU'D USE IT EVERY DAY

It shows up. It does the work. *It asks first.*

🔁 A ritual, not a prompt

2 AM, 7 AM, 9 AM. Bagel comes to you, so there's nothing to remember to ask.

🦴 Done, not summarized

Drafts with attachments, cited briefs, appointments actually moved.

🛡️ Safe by default

One tap to send, AI disclosure on every call, read-only overnight.

🔒 Yours, not theirs

Open source, runs on open-weights models (Qwen 3.8 today), lives on your machine. Swap in any model, even one you run locally. Muse and Instinct are closed.

🛠️ Your backlog NEXT SHIFT

Overnight, Bagel hands the GitHub issues you've labeled to Cline (or `claude -p`) on your machine, each in its own branch. By 7 AM there's a draft PR with the tests run. You still tap to merge.

📞 Real phone lines

🔌 Real Gmail & Calendar via Composio

💬 The Morning Bark in Telegram

Bagel does the work, so you can go play frisbee with your dog.

🐾 GOOD BOY
